- Judgement/Decision-making

Citizen Science on-line

FrackFinder

Map drilling and hydraulic fracturing (fracking) across the United States to help build a comprehensive map of fracking infrastructure so that researchers can study the environmental and public health implications.

OpenOil

Improve transparency around oil contracts by understanding who is behind the contracts, who is controlling hundreds of subsidiaries, and by creating a corporate network map to better understand issues such as beneficial ownership and tax avoidance.

Shelter Assessment

This project is about assessing the suitability of emergency shelter, by answering simple questions about a series of photographs. (GeoTag-X)

Detect Sidewalks

Mapping the presence of sidewalks in streets allows a wider variety of applications to make use of OpenStreetMap data effectively, such as planning routes for people with reduced mobility and wheelchair users.

Somali Drought

This project investigates what information about drought symptoms can be extracted from photos taken during field assessments. Images in this project come from FAO SWALIM on Flickr. (GeoTag-X)

Pecuniary interests

A project initiated by The Guardian in Australia to investigate the register of interests - political gifts and investments in New South Wales.

District court

In this Icelandic data journalism project a few hundred enthusiasts parsed a huge database of scanned PDFs to see whether there are links between which way judges in that country vote, and how often they incarcerate. (In Icelandic)

Presupuestos Sevilla 2013

The revenues and expenditures for the municipality of Seville have been published as PDF documents. The project wants to transcribe the data from the PDF to a spreadsheet and arrange them in a set of transparent views for

Micromappers

Digital Humanitarian Network made Micromappers to verify whether tweets and other social media data about natural disasters like typhoons contains useful information.

“Rethinking Public Participation”
A partnership launched in 2009
