Questions ?!

What are the most important *questions/issues* that you think should be more *fully addressed* at future conferences on higher education?

Would you be interested in participating in a *future WAF event* that addresses *these issues*?

Which *people/organizations*
should be invited to *participate* in
a future event?

What *studies & research reports* present *new perspectives* vital to addressing these issues?

Would you be interested in *associating* with an international consortium of organizations committed to promoting the goals of *accessibility, quality, affordability, relevance and innovation* in higher education at the global level?

Who else do you think may
be *interested* in joining such an
initiative?

Discussion
