

Education for sustainability and inclusiveness for people and the environment

Prof. Petar Bulat

Faculty of Medicine University of Belgrade

Serbian Institute of Occupational Health

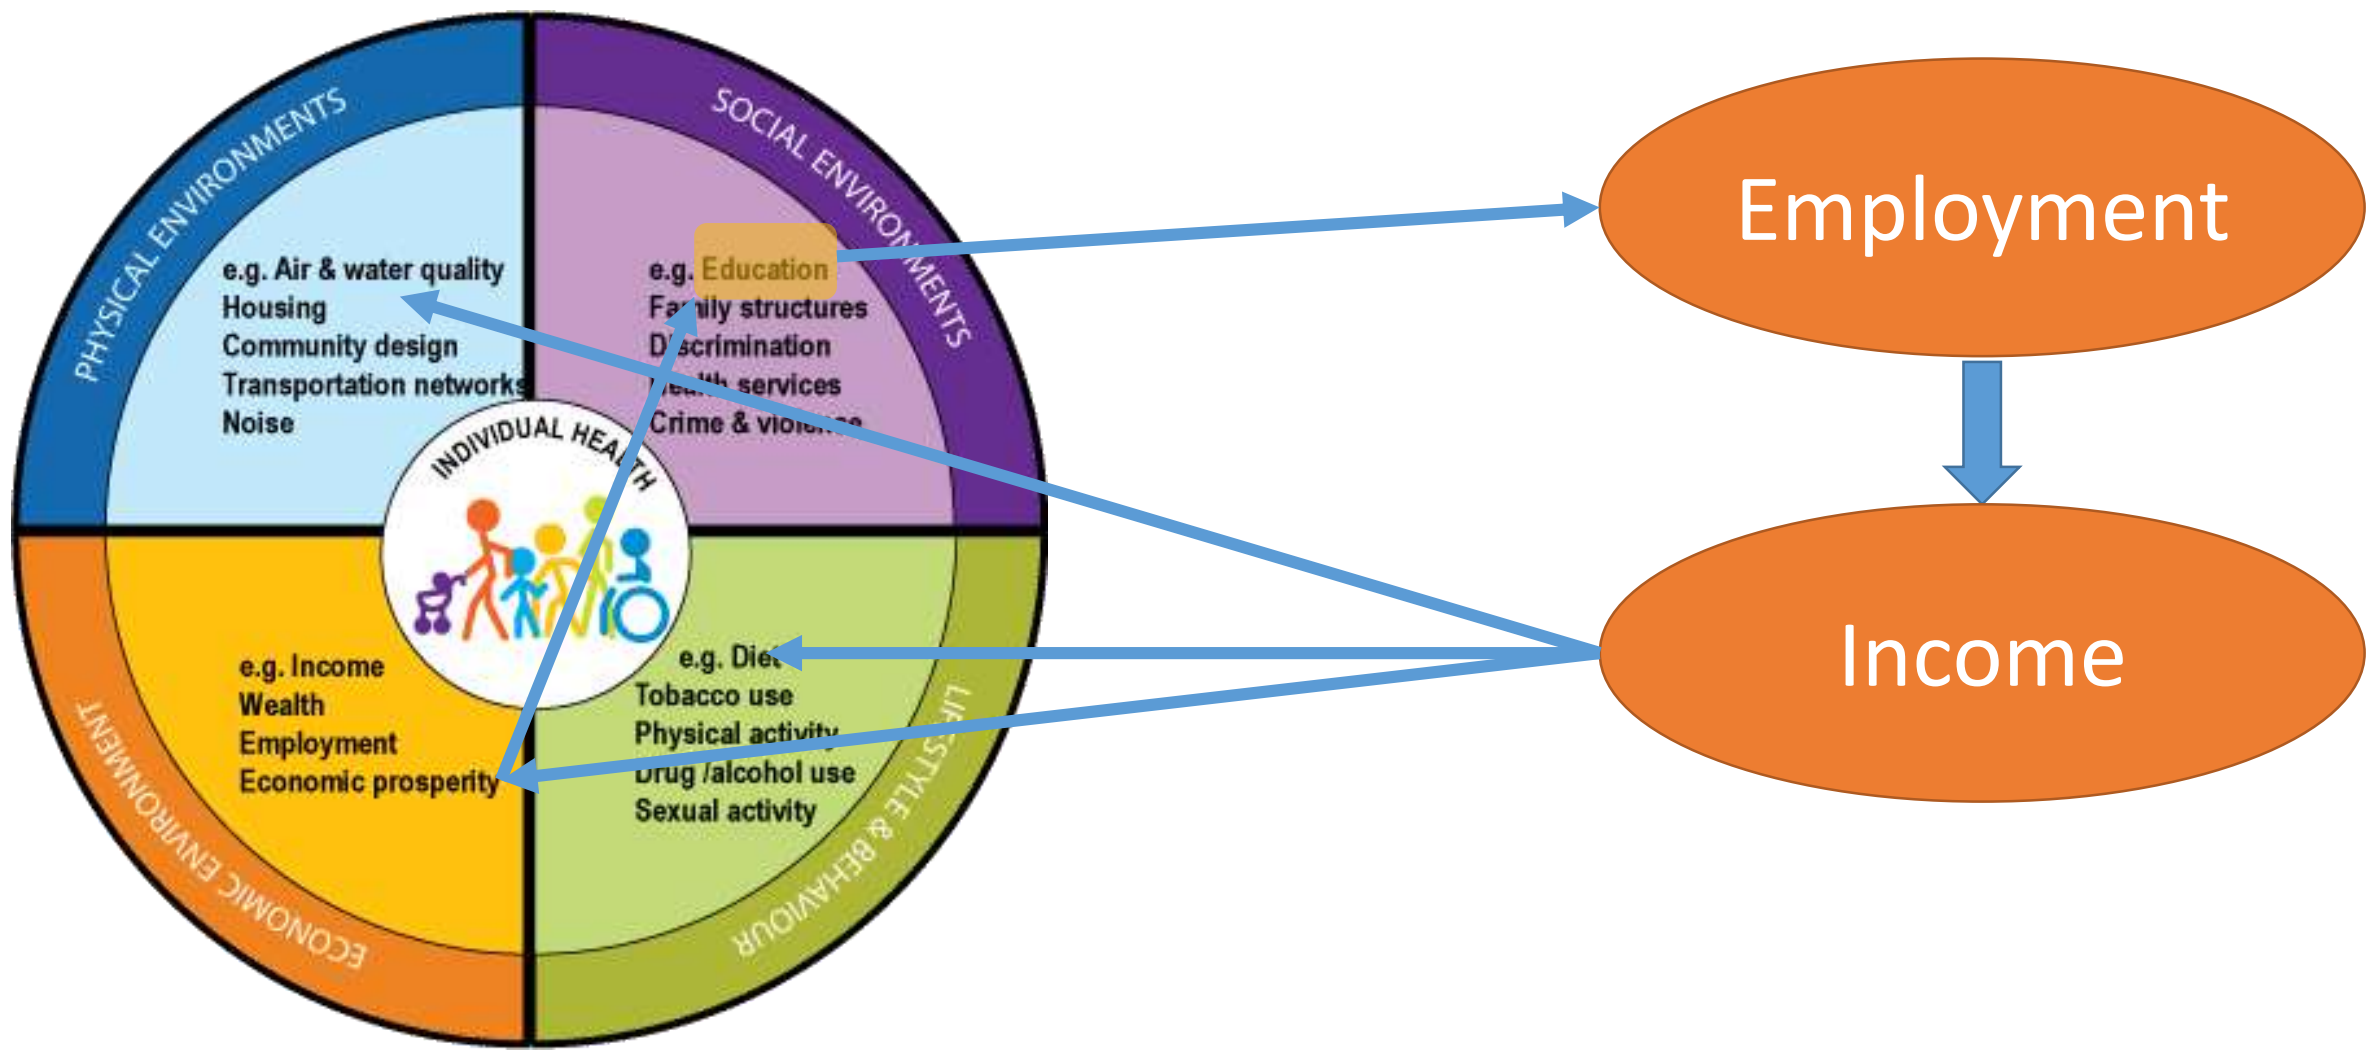

Content

- Introduction
- Inequalities
- Education, Inclusiveness, Sustainability and Environment
- Conclusion

Introduction

- Education is one of the key factors in the development of society.

Why education is the key?

Introduction

- Societies through development and political debate decided on education system which is the „best“ for them.
 - Public
 - Private
 - Mixed
- Level of obligatory education?

Introduction

- Each of these systems has advantages and disadvantages regarding inclusiveness which is the key for prosperity.
- The idea of inclusive education is to *include people who might otherwise be excluded or marginalized, such as those who have physical or mental disabilities and members of minority groups.*

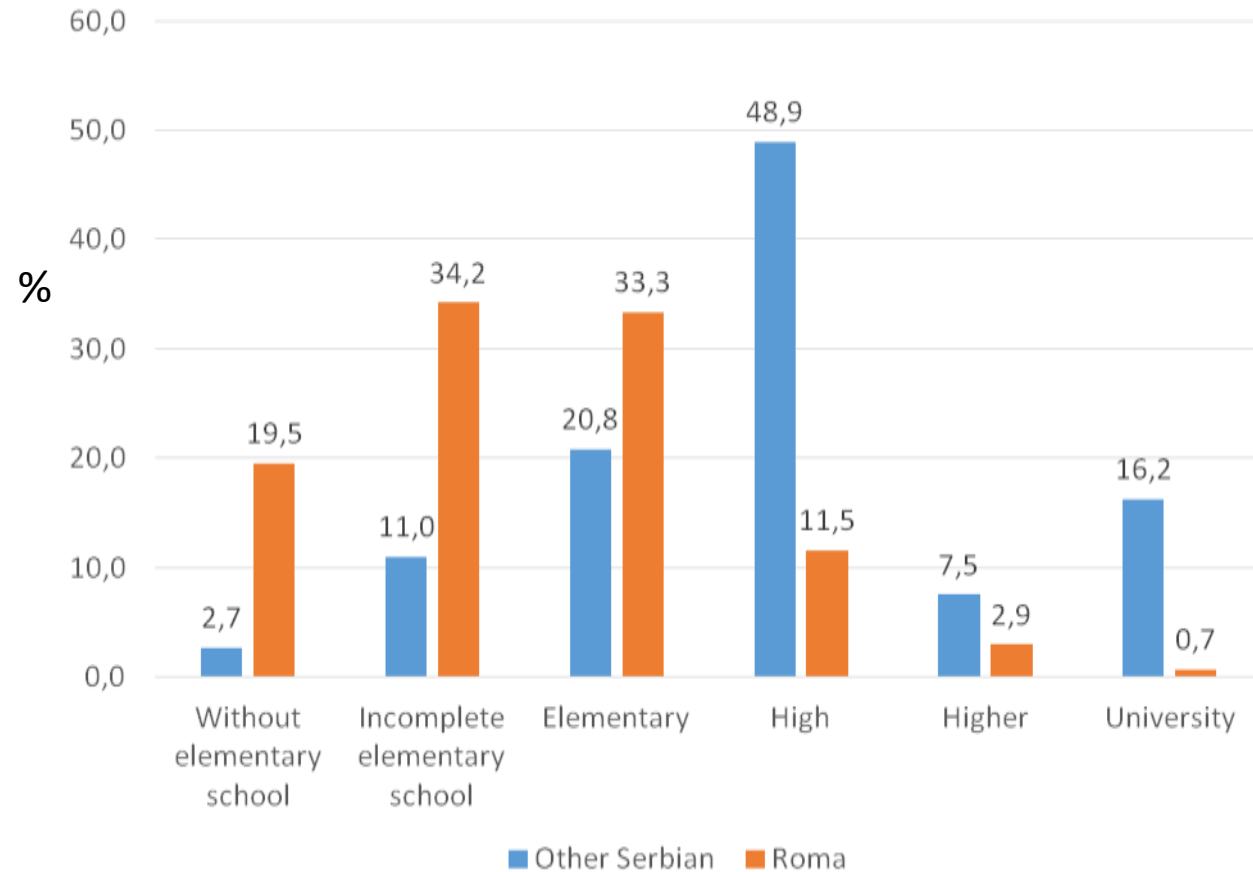

Education level urban vs. rural

The 2011 census data indicates that Serbian population living in rural areas is less educated than urban.

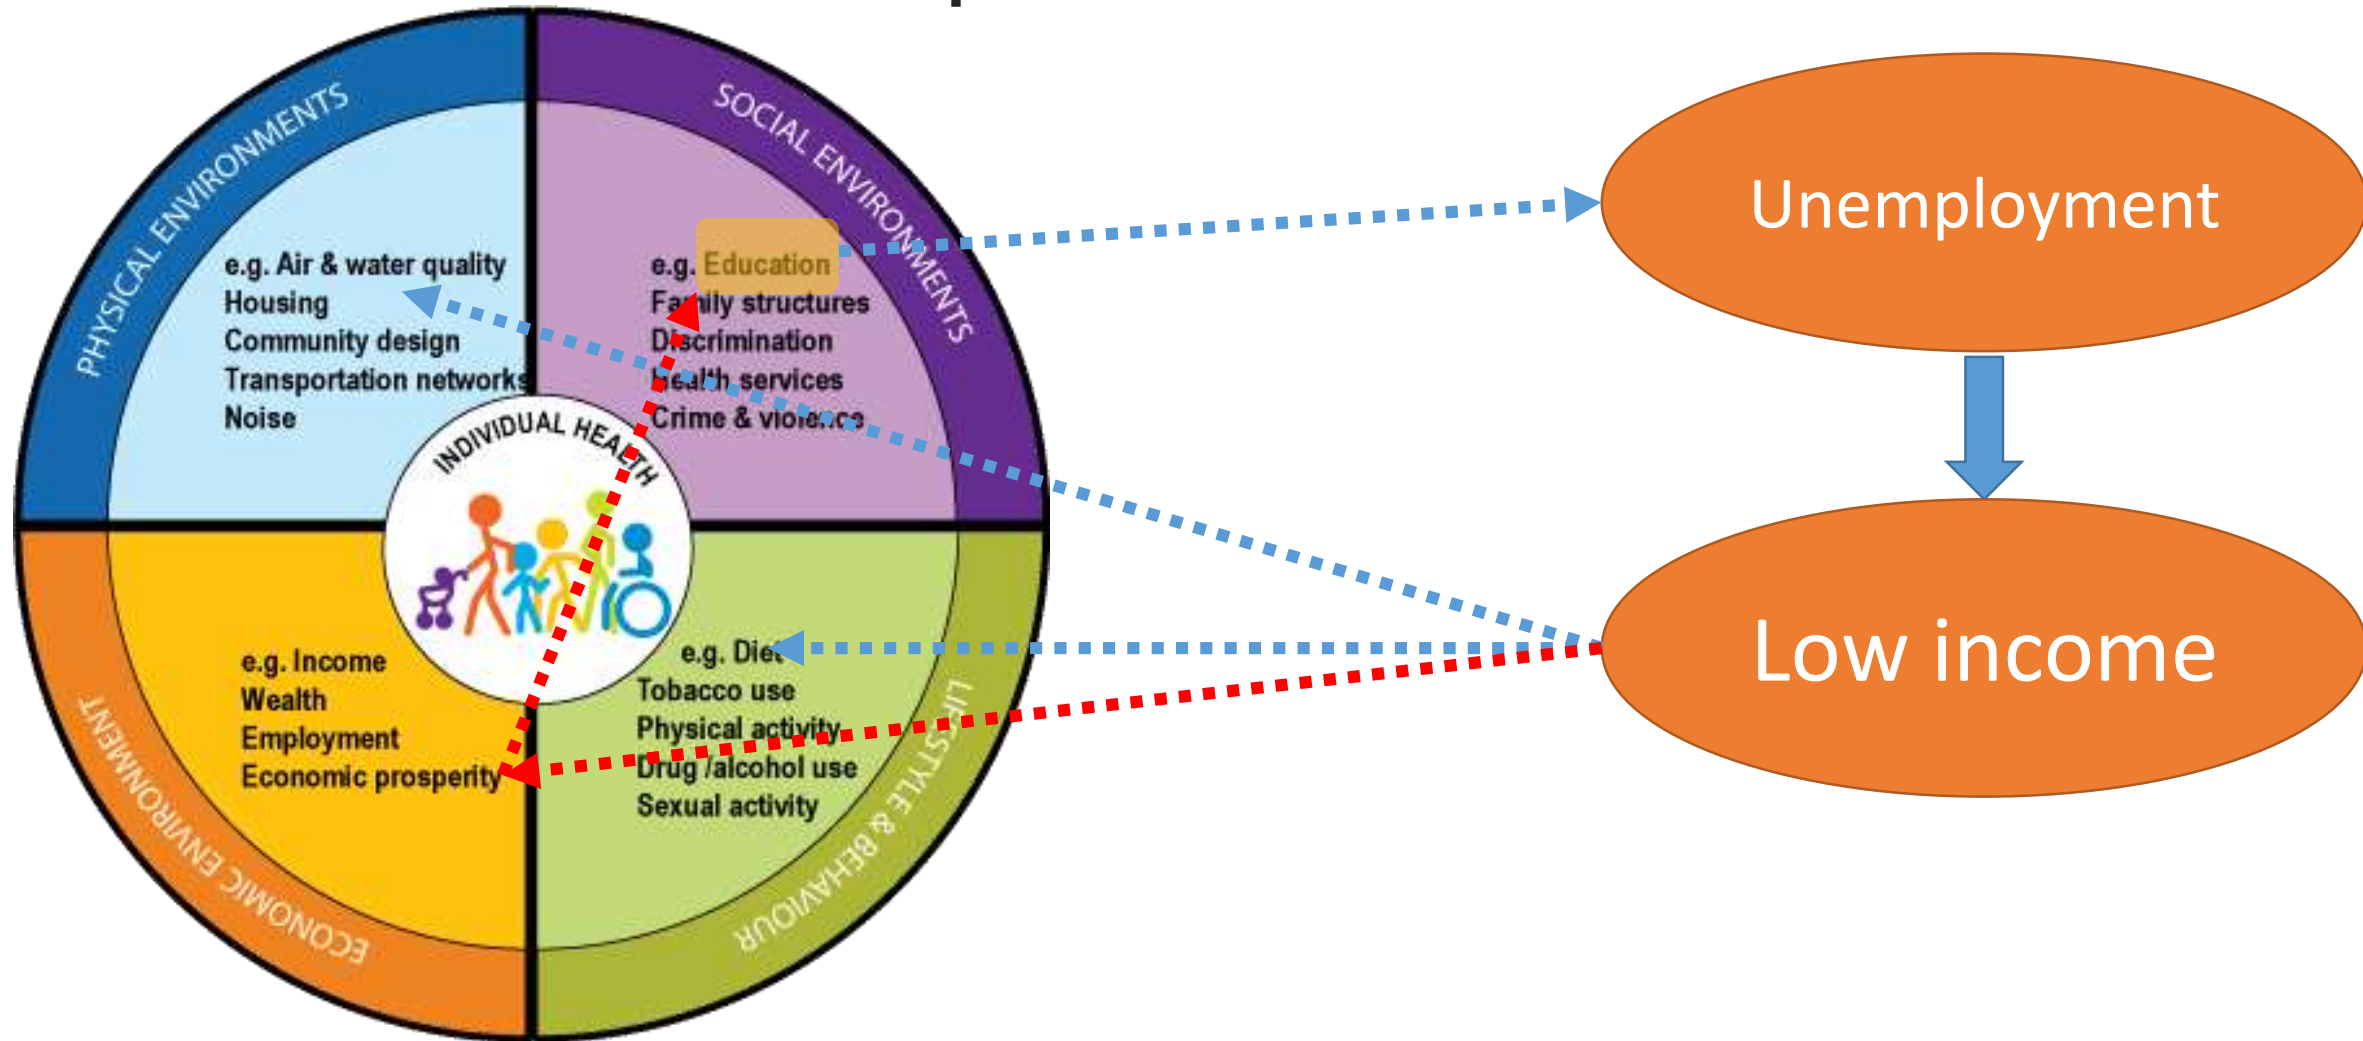

Education level Roma vs. other Serbian populations

The 2011 census data indicates that Roma population living in Serbia less educated than other Serbian populations.

Inequalities in access to the education system creates social inequality and this leads to social and political tensions

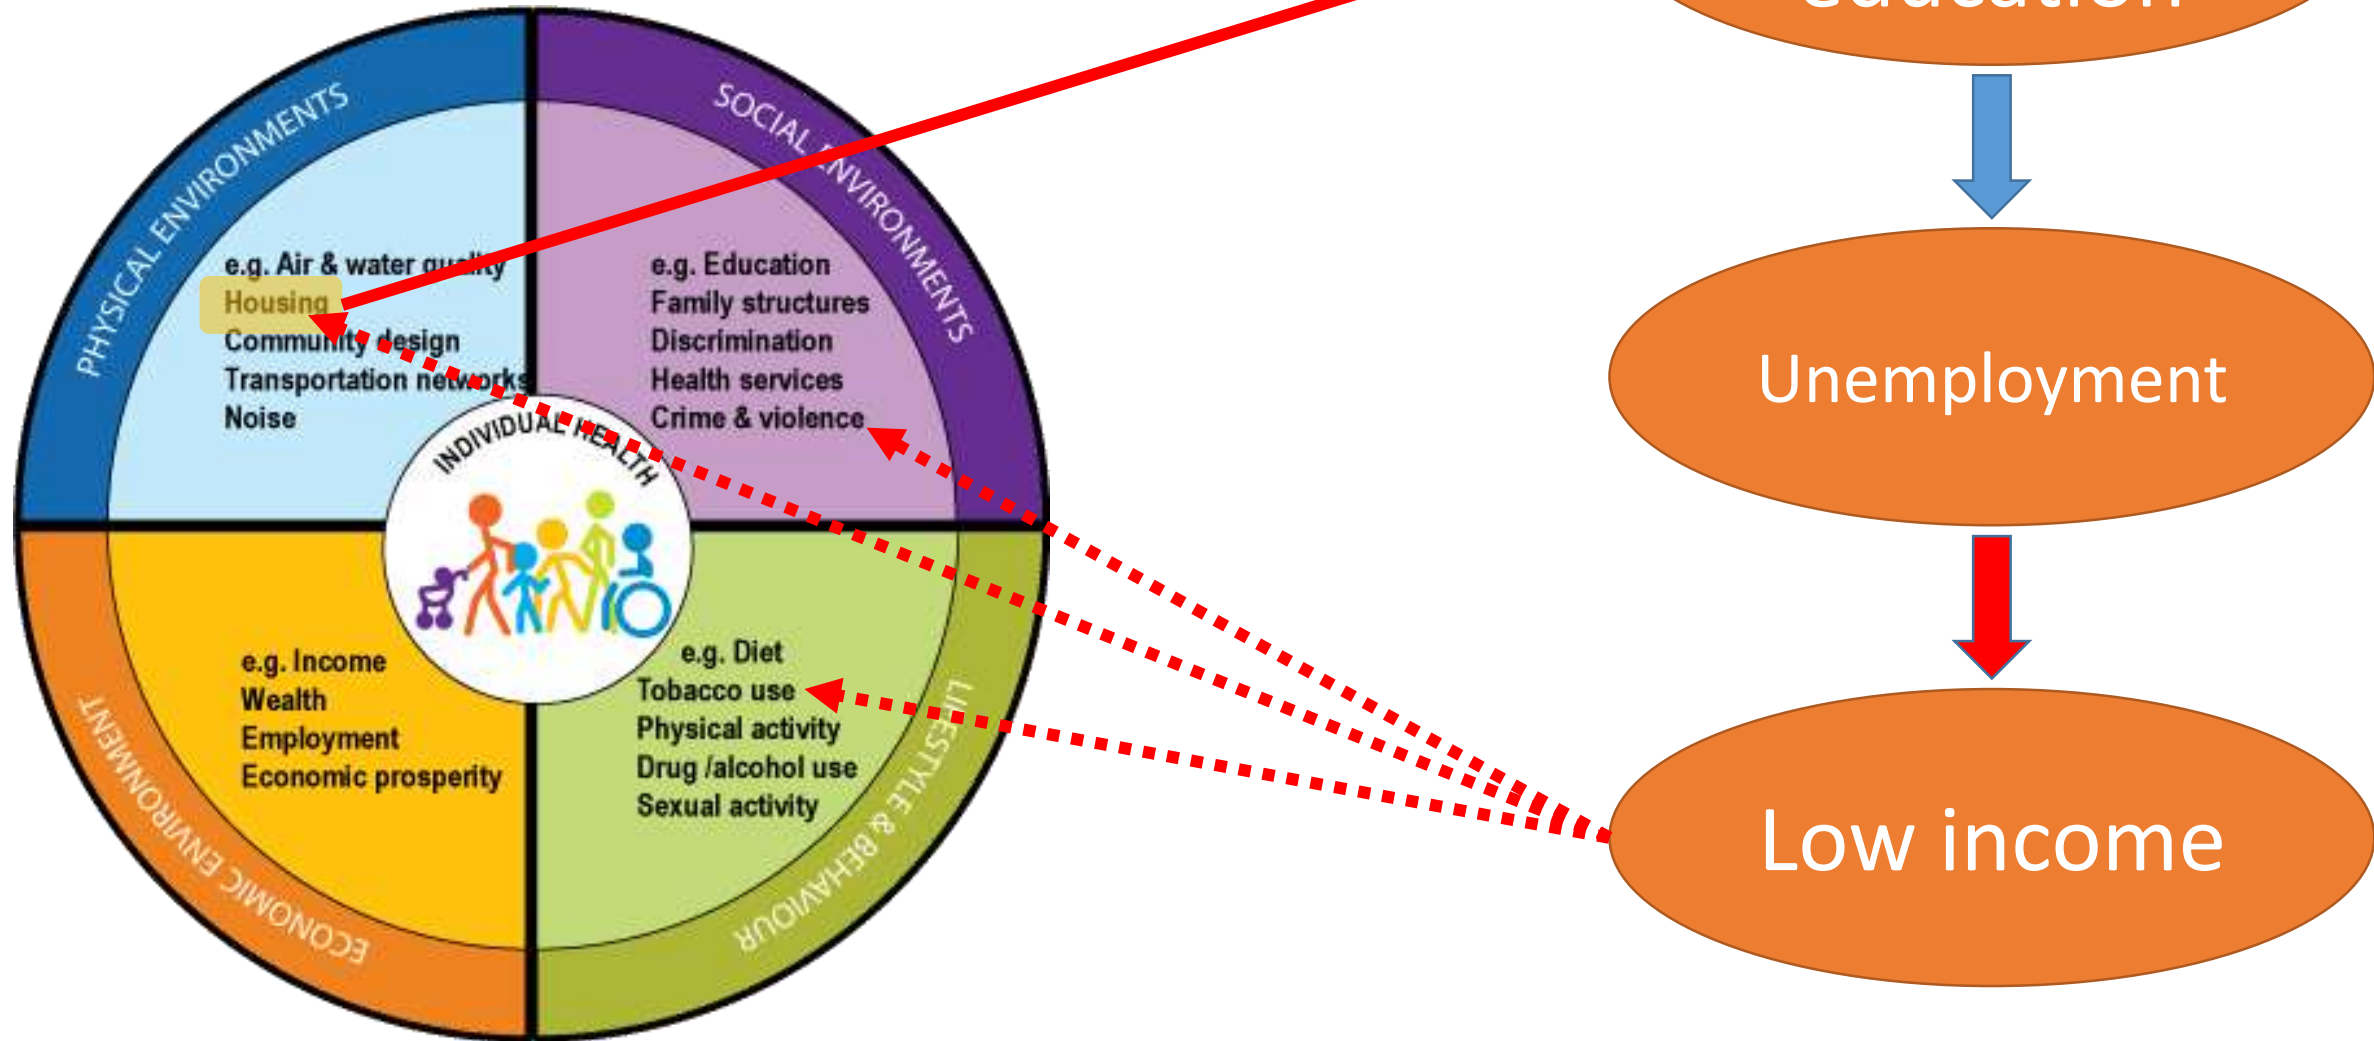

Education, Inclusiveness, Sustainability and Environment

- Education, Inclusiveness and Sustainability are like chain where the weakest link determines end result and environmental effects.
- One of the famous examples is use of lead based paints in US.

 Lead based paints used till 1960s
Children exposed to lead
Lead causes decrease in intellectual capacities
Low intellectual capacities leads to low educational level
Low income
Poor housing-with increased lead levels

Environment and Education

Conclusion

- Education is key factor for sustainable development of society. But it should be always kept in mind that only inclusive education is effective. In 21 century it is unacceptable to have inequalities in access to educational institutions.
- We should join efforts in developing effective educational systems which will prevent inequalities in educational process and provide educational background for sustainable development.
