# Chance and Causality

Janani Ramanathan  
Research Associate, The Mother's Service Society  
Associate Fellow, World Academy of Art and Science

We come across many  
real life incidents that  
we call chance,  
coincidence, luck...

**What have we explained by the term 'chance'?**

Is it possible that we have discovered all that there is?

Are there deeper, more subtle levels of causality that are yet to be learnt?

**The unrealized is not necessarily unrealizable**
